

As a truck driver the information we recieve on our XM Radio is a tool to keep me and my wife up to date on weather and other important news information that we may not recieve other wise, being on the road we don't have the time to sit and watch TV. We have to help keep America moving by delivering our loads on time and safely. The XM Radio is a learning tool as well for us and keeps us informed on weather conditions and other important news information that we would not other wise have. Take the weather in Nebraska last week if we did not have the XM we could have drove into a tornado. Thank you for listening and please leave XM Radio alone.
